

Seminar Series presentations are considered a supplement to firefighter and Fire Officer classes offered by the Connecticut Fire Academy. Classes provided by the Connecticut Fire Academy comply with NFPA standards and best practices of the fire service. Seminar Series are also based on these standards and practices but can and often do include opinions of the subject matter experts that are delivering the presentation. Attending any number of the Seminar Series will allow the student to, not only add to their existing training; but also encourage the student to choose from the opinions of different speakers to develop their own style of strategies and tactics at emergency scenes, as well as inspire them to acquire more knowledge on fire service subjects.

Construction Concerns: Modern Materials

Friday April 5, 2013

2013 Seminar Series • Construction Concerns: Modern Materials

Construction Concerns: Modern Materials

This course will discuss modern construction materials and methods, including manufactured wood materials; wood trusses and I-joists; steel stud and ultra-light trusses; structural steel; adhesives and fasteners; plastics; the effects of these materials and methods on fire behavior; and their use in renovating existing buildings. Use of these materials and construction methods make hazard recognition and pre-incident plans a critical part of incident size-up and risk management.

Instructor Biography -

Gregory Havel-Deputy Chief (Ret.)
Burlington (WI) Fire Dept.

Gregory Havel is a retired Deputy Chief, and a member of the Town of Burlington (WI) Fire Department. He has more than 30 years in the fire service, facilities management, and building construction; is a fire service instructor at Gateway
